

How Field Uses AI

AI IN FIELD'S ANALYSIS PROCESS

01

The client and Field choose the material.

Program files

Program data

Relevant research

02 - PROVA'S AI SYSTEMS

The systems read and organize the agreed material.

High-volume reading

What does the material contain?

Analytical structure

Which distinctions matter?

Source traceability

What supports each conclusion?

Limits and open questions

What remains uncertain?

03 - HELD BY A PERSON

A Field principal decides what the analysis supports.

Context, interpretation, uncertainty, and consequences are considered before anything becomes client-facing.

04

Field delivers work the client can use.

What the material supports now

What should be learned next

Important conclusions remain connected to their sources.
